

Cool Fiber Technology

Experience instant cooling sensation as you lay on top of the Serta® Perfect Sleeper Collection.

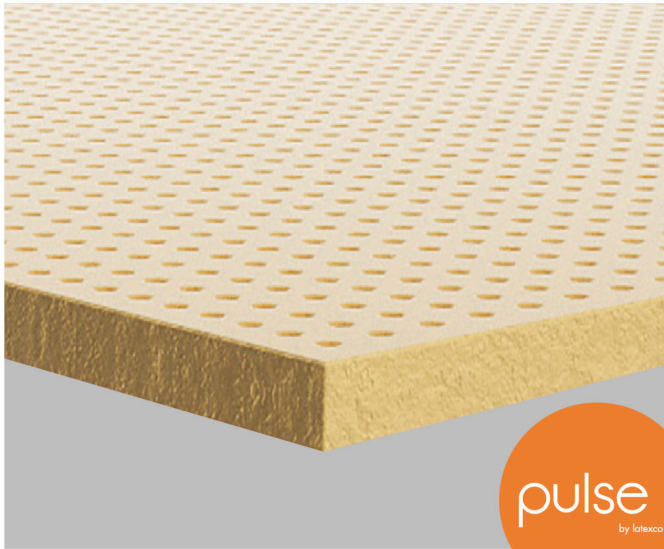

The Cool Fiber Technology gives your mattress a nice and soft **cooling sensation** on the outer layer, as the **cooling fiber** intertwines with the regular fiber, allowing a full coverage cool feeling.

Seduce your senses with the amazing cooling comfort of The **Cool Fiber Technology**.

Pulse Latex

This extraordinary material possesses a great tensile strength, stretching better and stronger than most conventional latex layers. The foam structure of **Pulse latex** enables it to regulate the micro climate inside the mattresses with its quick moisture release capabilities, providing humidity control and astonishing ventilation that makes your mattress **"breathes"** better. Keep your body well-rested with the extraordinary advantages of **Pulse latex**.

ViroSafe™ Technology

All fabrics used in this collection are fully treated with the ViroSafe™ Technology. This treatment provides a **protection** to your mattress against virus and microorganism penetration. The technology shows significant result in **reducing the viral and bacterial activities up to 99%**, creating a more hygienic and comfortable sleeping environment.
